Moluscos y Conchas Marinas de Canarias

ROLAN & All, 2011 - Moluscos y Conchas Marinas de Canarias \*\*\*\*

This 716 pages book with 130 color plates has as authors J. M. Hernandez, E. Rolan, F. Swinnen, R. Gomez and J. M. Pérez under the coordination of Rolan.

A bad point is that this book has been written in Spanish, in a time where scientific language is definitely English, the Latin of today. This will strongly limit its distribution and popularity.

The texts are very well done: useless long descriptions were fortunately reduced to the essential. For each shell, there is the reference to the original description, a guide to the type material, dimensions, range and a bibliographic reference. I personally like that style.

The plates are overstocked with figures in a chaotic arrangement. The authors never heard of photoshop: Dark images, poor shadows and all other photographic defects that are easily removed by experts today, still abound in this work.

Despite the poor plates and the Spanish language I give this book a 4 stars. The compilation is well done, for the first time many Canary Island species have been figured with readable photographs and the book fills the gap between West African and European species. A large number of amphiatlantic species is shown as well.

Together with the Belgian production on Madeira shells, a great addition to the modern malacological library.

4 Stars \*\*\*\*

= Region 4 stars

This means that the book is of prime importance, either it's important for a region, a family or any given subject, even this can be on the history of shell collecting.

Advised for all libraries.
